

# VOLVO PENTA INBOARD DIESEL

# D1-13

9.0 kW (12.2 hp) crankshaft power acc. to ISO 8665

## D1 and D2 series – a new standard for yacht comfort

The new Volvo Penta D1 and D2 series are designed with priority for highest comfort onboard.

Low cruising rpm gives quiet running and low vibrations, and exhaust emissions are extremely low. Compact size means easy installation, and the 115A alternator with a built-in charging sensor provides rapid charging for onboard electrical needs. Setting a new standard for yacht comfort.

The base engine is developed for industrial applications for heavy and medium duty and marinized for the highest marine demands. This guarantees a reliable engine with a long service life.

### Service Life

The D1-13 is fitted with freshwater cooling as standard. This reduces internal corrosion and enables the engine to maintain a consistent and optimal working temperature under all conditions.

To avoid galvanic corrosion the engine is equipped with a unique electrical isolation between engine and S-drive.

### Comfort

Smooth running with very low vibration levels is achieved through a dynamically balanced design incorporating a flywheel of high rotating mass and high efficiency rubber isolation.

The new engine with re-designed combustion chambers and lower engine speed – 2800–3200 rpm – together with the new inlet air silencer gives the highest comfort on board.

The noise is reduced by 3–4 dBA.

The engine's high torque provides excellent operating characteristics to aid maneuvering, particularly in confined spaces.

Additional on board comfort features are available from an extensive range of matched accessories.

### Charging capacity

The new 115A alternator with an electronic sensor makes it possible to use a higher battery capacity and have fully charged batteries on board. Even at idle speed, the alternator gives more than 35A, and at cruising speed it delivers approx. 100A.

### Transmissions

Six matched transmission options are available, each built for durability and smooth running.

### Environment

An advanced combustion system increases fuel burning efficiency to minimize noxious exhaust emissions and enhance overall enjoyment of boating. The D1-13 is certified according to BSO, SAV, RCD and EPA 2.

D1-13 with S-drive 130S

# D1-13

## Technical description:

### Engine block and head

- Cylinder block and cylinder head manufactured from high grade cast iron. Crankcase features a rigid tunnel block design.
- Chrome molybdenum forged crankshaft, statically and dynamically balanced with integral counterweights. Pistons are cast from high silicon aluminum, are heat treated and fitted with two cast iron, chromium faced compression rings and a single oil ring.
- Replaceable, hardened valve seats
- Elastic coupling on flywheel

### Engine mounting

- Tuned front and rear cushion-type rubber mounts. Adjustable.

### Lubrication system

- Spin-on fullflow oil filter
- Separate oil scavenger pipe
- Closed circuit crankcase ventilation

### Fuel system

- Flange mounted, cam driven in-line injection pump
- Feed pump with hand primer
- Spin-on type fine fuel filter

### Exhaust system

- Freshwater cooled exhaust manifold and seawater cooled exhaust elbow

### Cooling system

- Freshwater cooling system governed by thermostat
- Tubular heat exchanger with integral expansion tank
- Coolant system prepared for hot water outlet fittings
- Easily accessible sea water pump and impeller

### Electrical system

- 12V corrosion-protected electrical system
- 14V/115A marine alternator
- Charging regulator with electronic sensor for voltage drop compensation
- Glow plugs for excellent cold starting
- Electric starter motor
- Electrical stop function
- Extension cable harness with plug-in connection available in various lengths

### Instrument panel

Standard panel, including:

- Optional rev counter incl. hour counter
- Start button or key switch

- Alarm (for monitoring temperature, oil pressure and charge rate)
- Instrument panel lighting
- Switch for alarm test and glow

### Choice of transmissions:

- Housing of gravity die-cast aluminum alloy
- Mechanical multiple-disc clutch shift
- Safety coupling with built-in overload protection

**MS10A** – reverse gear with 8° down angle output.

- Ratio 2.35:1/2.70:1 (RH/LH) and 2.72:1/2.70:1 (RH/LH).

**MS10L** – reverse gear with straight output.

- Ratio 2.35:1/2.26:1 (RH/LH) and 2.72:1/2.26 (RH/LH).

**S-drive 130S** and **130SR** for reverse installation of engine. Ratio 2.19:1.

### Accessories

- Engine controls and steering systems
- Additional instrument panels and instruments
- Battery and battery switches
- Hot water systems
- Separate expansion tanks
- Cooling water seacocks, strainers and hoses
- Exhaust systems and hull fittings
- Fuel systems including filters, pipes etc.
- Propeller shaft systems and propellers
- Chemical products – paints, oils, cleaners etc.

## Technical Data

Engine designation	<b>D1-13</b>
Crankshaft power, kW (hp)	9.0 (12.2)
Propeller shaft power, kW (hp)	8.6 (11.8)
Engine speed, rpm	2800–3200
Displacement, l (in <sup>3</sup> )	0.51 (31)
Number of cylinders	2
Bore/stroke, mm (in.)	67/72 (2.64/2.83)
Compression ratio	23.5:1
Dry weight with reverse gear MS10A/MS10L, kg (lb)	113/112 (249/247)
Dry weight with sail drive 130S, kg (lb)	126 (278)

Duty rating: R5

Technical data according to ISO 8665. With fuel having an LHV of 42,700 kJ/kg and density of 840 g/liter at 15°C (60°F). Merchant fuel may differ from this specification which will influence engine power output and fuel consumption.

The engine is certified according to BSO, SAV, RCD and EPA 2.

## Dimensions D1-13/MS10A/130S

Not for installation

Contact your local Volvo Penta dealer for further information.

Not all models, standard equipment and accessories are available in all countries. All specifications are subject to change without notice.

The engine illustrated may not be entirely identical to production standard engines.
